Attendance and Registration

Between April and June 2022, we registered 8 new families and 19 new children. Currently, we have 46 children from 22 families coming to the centre daily. We also registered 7+ years old children with the closure of schools during the summer.

Language and art classes

In the last quarter, the children experimented playing with clay and kinetic sand. We practiced with different art activities such as finger painting, collages, and making larger artistic murals, and practiced creating new textures by using sponges and toothbrushes, etc. The parents also enjoyed this creative time and often joined them.

Workshops

In collaboration with Amurtel, we hosted a series of workshops on sexual and reproductive health.

In collaboration with Acupuncturist Without Border - Greece, we continued hosting workshops on massage and relaxation techniques.

We also continued our monthly distributions of diapers and sanitary towels.

COVID-19 Impact

We provided masks and COVID-19 tests for the families until the end of May. Since June 1st, masks are not mandatory in closed space nor COVID-19 certificates. We decided to keep wearing masks to protect our vulnerable families. This softening of COVID-19 measures also allowed us to welcome more families in each group.
