Attendance and Registration

From July until September 2022, we registered 18 new families and 40 new children. This high number of new registrations is partly due to the fact that many of our families left Greece in August after receiving their documents. Currently, we have 46 children from 23 families coming to the centre daily.

Language classes

Despite The Nest being exceptionally closed for 11 days, we were able to provide many hours of language lessons for the parents. Between August-September, we didn’t provide lessons for 4 weeks due to a lack of volunteers. We stopped our German classes following the departure from Greece of the families interested in the German lessons.

Workshop & distributions

On September 22nd, we started to host our workshops on sexual and reproductive health again, in collaboration with Amurtel. We plan on continuing them throughout the year so that every mother can have access to them.

We also continued our monthly distributions of diapers and periodic protections.

1 year of Art at The Nest

This summer, we celebrated the anniversary of our Art Project.
Thanks to the many materials that are available at The Nest, we’ve been able to try a lot of different techniques with the children and their parents: fingerprinting, drawing on a big paper on the wall, carving clay, collage, jewellery making, creating a story book, etc.

A special visit

On Thursday August 25th, we had a special visit from With You Foundation members, including famous Iranian American singer, Ebi. They spent an entire session playing with the children and talking to the families before sharing cakes and a few songs together.
